FIRE AND SAFETY ENGINEERING

EDUCATION

B.Tech. – Fire and safety Engineering Ganga Institute of Technology and Management, Haryana	2023-2027
Diploma – fire & Safety Management	2022-2023
INTERMEDIATE Uttar Pradesh Board Shaheed Madhuban Karamad Inter College , UP	2022
MATRICULATION CBSE Saraswati Vidya Mandir	2020

EXPERTISE

Fire Risk Assessment and Hazard Identification | Fire Prevention and Protection Systems | Fire Cylinder Inspection and Maintenance Procedures | Emergency Response Planning | Safety in Construction | Safety Documentation and Audits | Training and Safety Awareness

TRAININGS

Subros Limited | November 2025

- Gained practical exposure in fire extinguisher inspection, hazard identification, emergency preparedness, and industrial safety compliance within a large-scale thermal power plant.

India Fire and Security Yatra | October 2024

- Gained knowledge of life safety practices during fire incidents, including evacuation planning, fire alarm response, proper use of fire extinguishers, and emergency preparedness.

Fire India Exhibition 2024 | September 2024

- Attended Asia's premier fire and safety exhibition at Yashobhoomi, New Delhi, featuring live product demonstrations, advanced fire detection and suppression technologies, and innovation panels.

PROJECTS

FIRE ALARM SYSTEM

- Designed a fire alarm system layout as per **NBC guidelines**, including smoke/heat detectors, MCPs, sounders, and control panel.
- Planned **zone-wise detection and alarm coverage** based on building occupancy and risk assessment.
- Ensured effective **early fire detection, alarm audibility, and emergency response coordination**.

EMERGENCY EVACUATION PLAN DESIGN SPECIALIST

- Developed a comprehensive **fire evacuation plan** with marked escape routes, exits, staircases, and assembly points.
- Designed **evacuation maps, signage placement, and emergency lighting** for safe occupant movement.
- Defined **roles, responsibilities, and evacuation procedures** to ensure orderly evacuation during fire emergencies.

AUTOMATIC SPRINKLER SYSTEM

- Designed an **automatic fire sprinkler system** in accordance with **NBC fire safety requirements** for effective fire suppression.
- Planned **sprinkler layout, spacing, and coverage** based on hazard classification and occupancy type.
- Developed understanding of **water supply, control valves, piping arrangement, and system activation principles**
