OBJECTIVE

Aspiring AI/ML Engineer skilled in Python, Machine Learning, Deep Learning, NLP, Data Analysis, TensorFlow, and Scikit-learn. Seeking opportunities to build intelligent and scalable AI solutions.

EDUCATION

Bachelor of Technology (B.Tech) in Computer Science	2023 – 2027
Ganga Institute of Technology and Management (GITAM), Haryana CGPA: X.XX/10	
Senior Secondary (Class XII),	2022
Thakur Prasad Singh College (TPS College), Patna, Bihar Percentage: XX%	
Secondary (Class X),	2020
Thakur Ram Mathura Prasad High School, Ghorasahan, Bihar 2020 Percentage: XX%	

SKILLS

Technical Skills

Programming Languages: Python, C/C++, SQL

Data Structures & Algorithms: Arrays, Linked Lists, Stacks, Queues, Trees, Graphs, Hashing, Recursion, Backtracking, Sorting, Searching, Greedy Algorithms, Dynamic Programming

Machine Learning: Supervised Learning, Unsupervised Learning, Regression, Classification, Clustering, Feature Engineering, Model Evaluation, Cross Validation, Hyperparameter Tuning

Deep Learning: Artificial Neural Networks (ANN), Convolutional Neural Networks (CNN), Recurrent Neural Networks (RNN), LSTM, Transfer Learning

Natural Language Processing (NLP): Text Preprocessing, Tokenization, TF-IDF, Feature Extraction, Text Classification, Sentiment Analysis

Libraries & Frameworks: NumPy, Pandas, Matplotlib, Scikit-learn, TensorFlow, PyTorch

Tools & Technologies: Git, GitHub, Docker, Jupyter Notebook, VS Code, Google Colab

Database: PostgreSQL

SOFT SKILLS

Problem Solving and Analytical Thinking, Effective Communication, Team Collaboration, Time Management and Prioritization, Adaptability and Continuous Learning, Research Orientation and Curiosity

EXPERIENCE

Software Developer Intern	May 2024 - October 2024
Hummingbyte Technologies Pvt. Ltd.	
- Developed and optimized software solutions using Python - Implemented features and resolved bugs to improve application performance - Collaborated with cross-functional teams to deliver efficient solutions - Worked on real-world problem-solving and code optimization	

PROJECTS

Laptop Price Prediction (Machine Learning)

- Built a regression model to predict laptop prices based on features like RAM, processor, and storage
- Performed data preprocessing and feature engineering using Pandas and NumPy
- Achieved accurate predictions using Scikit-learn models

Movie Recommendation System

- Developed a recommendation system using content-based filtering techniques
- Suggested movies based on user preferences and similarity scores
- Implemented using Python and basic NLP techniques

Resume Checker (NLP)

- Built an NLP-based system to analyze resumes and match them with job descriptions
- Used text preprocessing techniques like tokenization and TF-IDF
- Improved keyword matching and resume evaluation

Restaurant Management System

- Developed a system to manage orders, billing, and customer data
- Implemented using Python with focus on backend logic and data handling
- Improved efficiency in managing restaurant operations

EXTRA-CURRICULAR ACTIVITIES

Participated in Google Cloud Arcade Facilitator Program and completed multiple cloud labs and challenges, Gained practical exposure to Google Cloud Platform (GCP) services, Regularly explore research papers in AI, Machine Learning, and NLP, Practicing Data Structures and Algorithms on coding platforms

LEADERSHIP

- Demonstrated leadership by taking initiative in learning and implementing AI/ML projects independently
- Collaborated effectively with team members during internship to deliver efficient solutions
- Actively engaged in technical programs such as Google Cloud Arcade Facilitator, enhancing practical knowledge
